

Conheça o novo SIMET

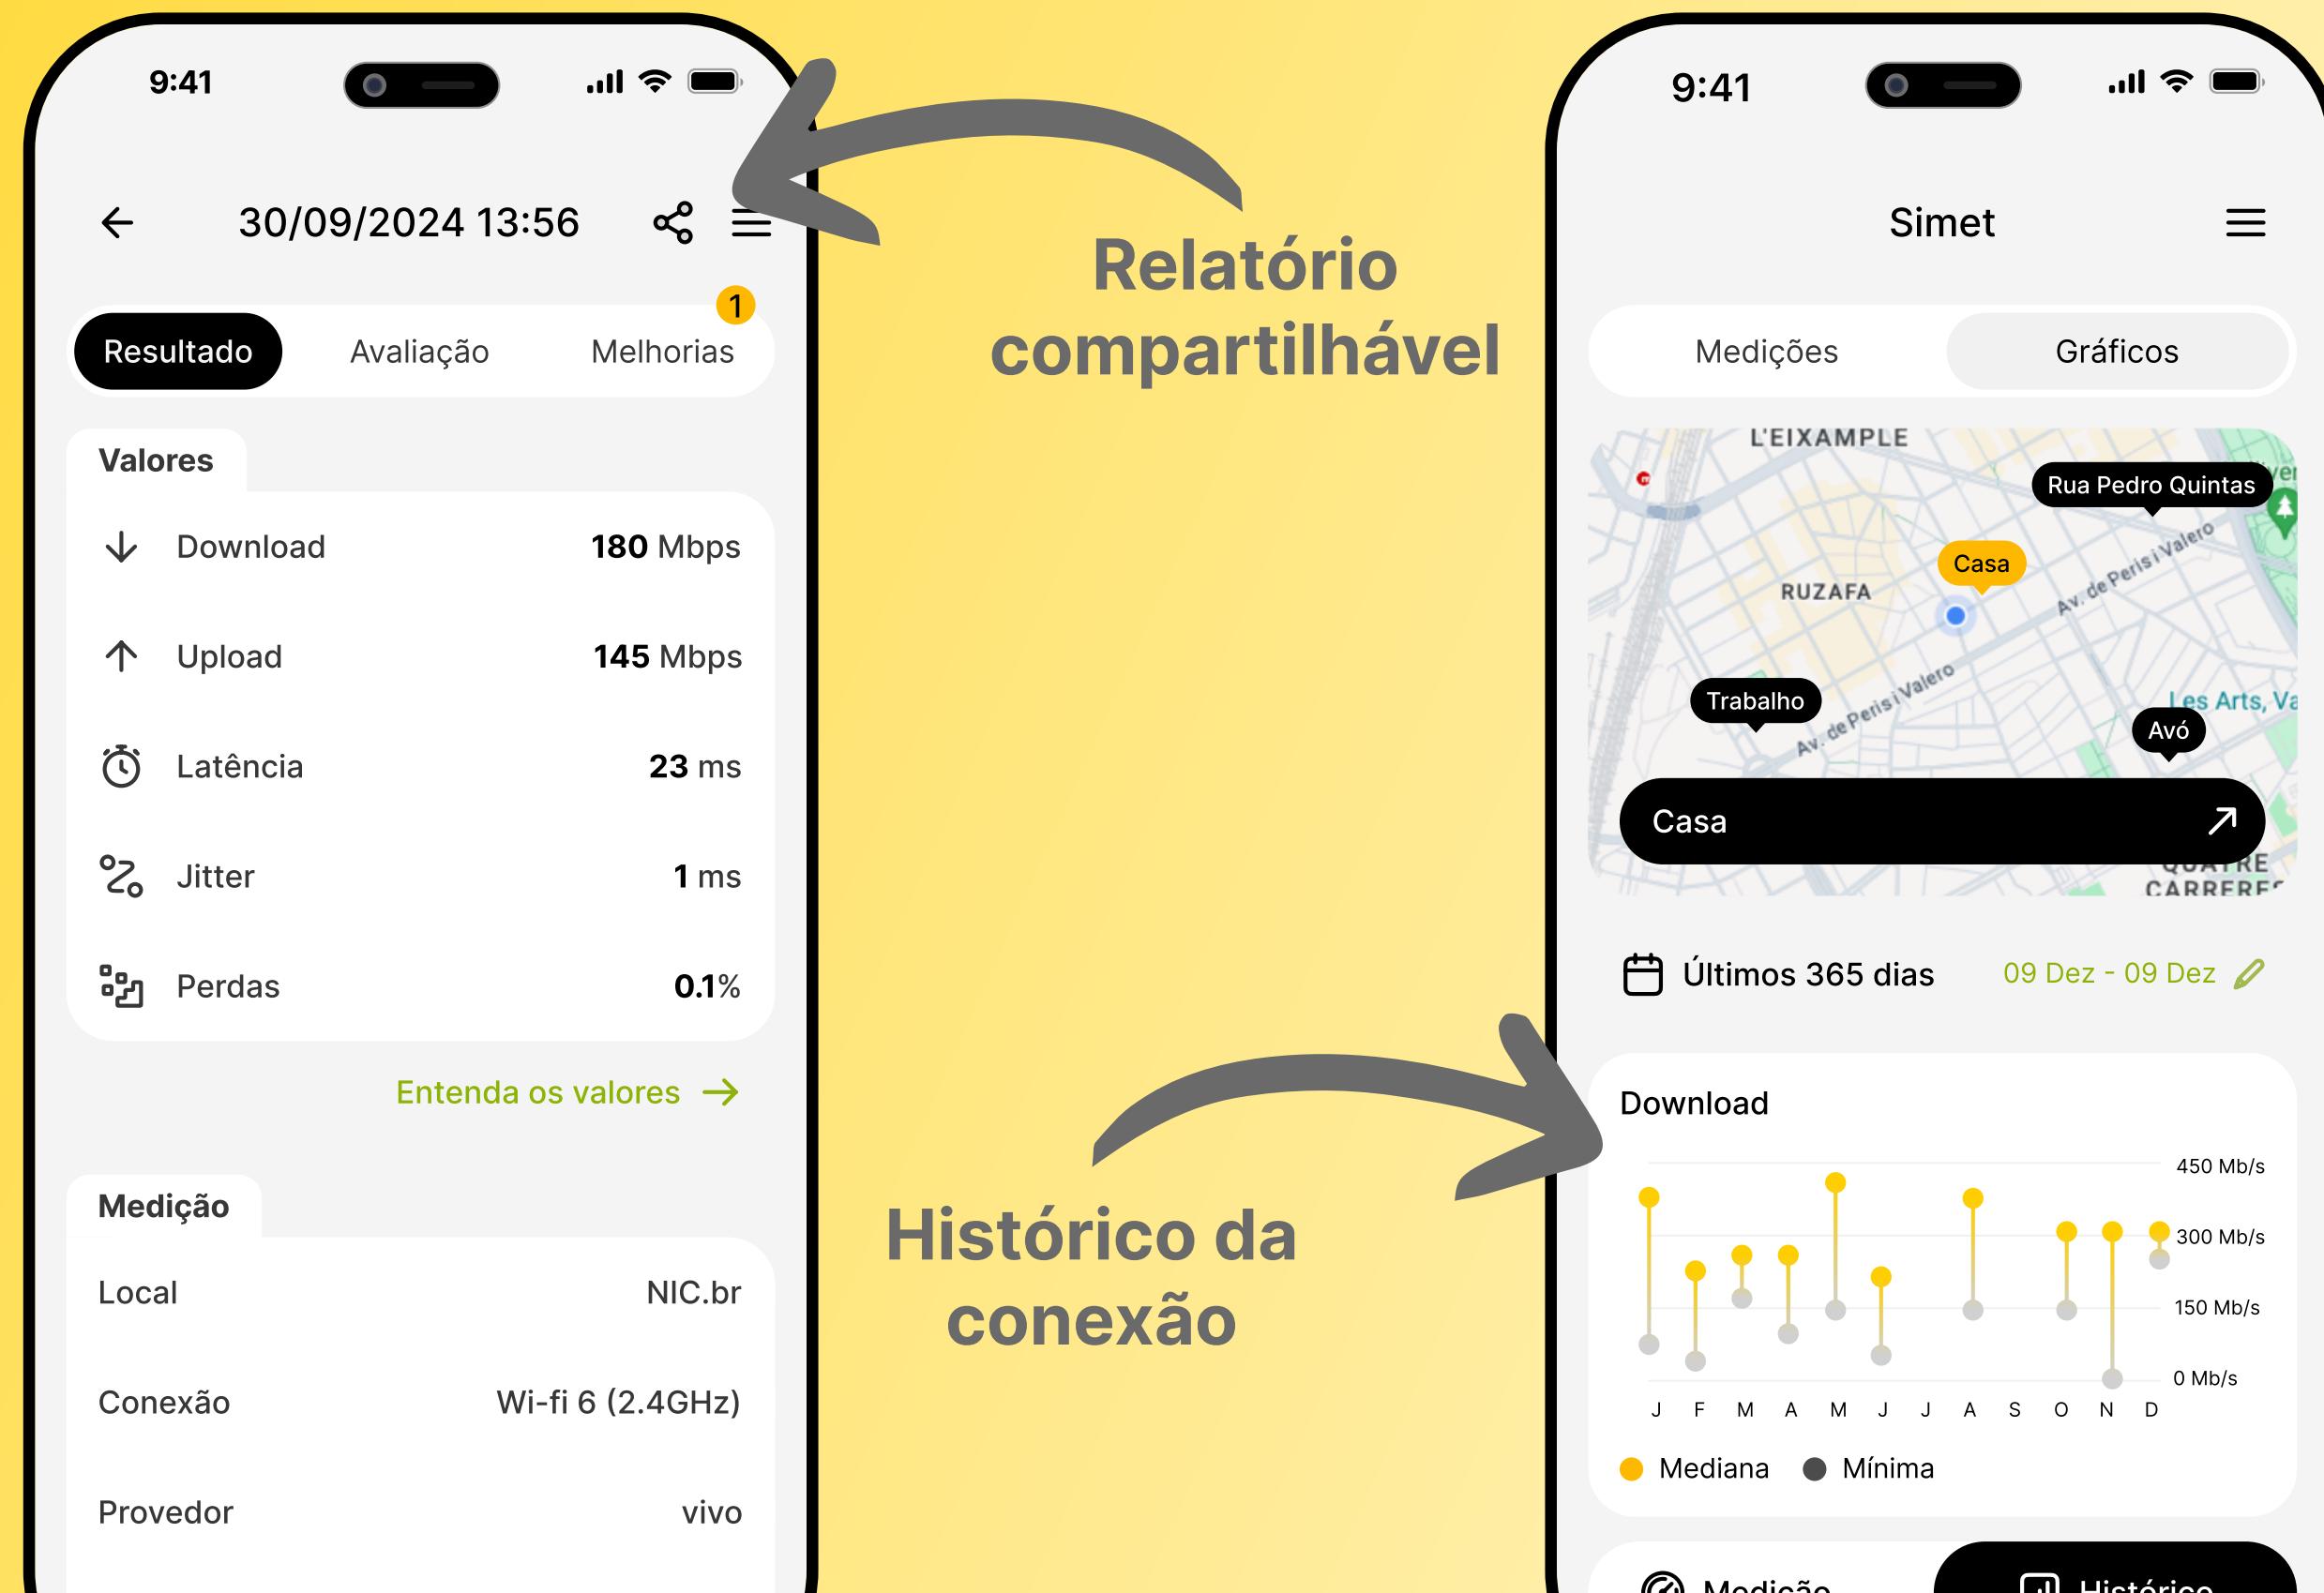

IX Fórum 19, São Paulo, 2025

Holger Araújo Wiehen
NIC.br

Foco 1: Descomplicar a conexão do usuário comum.

Foco 2: Facilitar a relação usuário – provedor.

The image displays two side-by-side screenshots of a mobile application interface, likely for network speed testing. The left screenshot shows a detailed report for a specific date and time (30/09/2024 13:56). It includes a 'Resultado' section with values for Download (180 Mbps), Upload (145 Mbps), Latência (23 ms), Jitter (1 ms), and Perdas (0.1%). Below this is a 'Medição' section with details: Local (NIC.br), Conexão (Wi-fi 6 (2.4GHz)), and Provedor (vivo). The right screenshot shows a map view with locations marked: 'Casa' (home), 'Trabalho' (work), and 'Avô' (grandparent). It also displays a line graph for 'Últimos 365 dias' (Last 365 days) showing 'Download' speeds over time, with markers for 'Mediana' (Median) and 'Mínima' (Minimum). A legend indicates that yellow dots represent the median and grey dots represent the minimum. Arrows point from the text 'Relatório compartilhável' to the share icon in the top right of the left screen, and from the text 'Histórico da conexão' to the graph in the right screen.
